

**PAP**

**PAPER STRAPPING MATERIAL**

Strapping plays an important role in securely sealing packages and boxes. That is why the stable and tear-resistant paper strapping tape is a good alternative to conventional PP tape. It is easily recyclable, environmentally friendly and ensures sustainable and stable packaging.

The paper strap can be easily processed in the Cyklop strapping machines M-Pac V and Ampag Boxer II (up to a maximum frame size of 850 x 600). By heating the incorporated glue, the paper strap is closed securely and offers an optimal, durable solution for your strapping application.

**Characteristics**

- Sustainable packaging
- Environmentally friendly
- Robust
- Tear resistant
- 100% recyclable

Our paper strap consists of paper fibers that are twisted together like a cord. These paper cords are then glued together with an environmentally friendly glue. This creates a stable strap that is very resilient.

Technical specifications:	
Strap width:	12 mm (±0,5 mm)
Strap thickness:	1,0 mm (±0,2 mm)
Length on roll:	1.500 m/roll
Weight:	11 kg/roll
Tension:	1.060 N
Wear resistance:	ca. 75%
Glue:	Polyvinyl acetate
