TAPING

Paper tape is the environmentally friendly solution for closing boxes. The packaging can be recycled in its entirety after use, including the adhesive tape. Due to the direct and strong adhesion, paper tape is also suitable for heavy packaging. Another great advantage of paper tape is that it cannot be removed without damaging the box, which has a preventive effect against theft.

Paper tape can be divided into two types: self-adhesive tape and gummed tape. Gummed tape only sticks after the adhesive layer is activated with water. A dispenser is therefore always required for application.

Dispenser

The paper tape dispenser Lapomatic 200 is an electrical tape dispenser for extra wide gummed paper tape up to 200 mm. The device is suitable for closing large numbers of packages per day. The Lapomatic 200 is reliable, low-noise, user-friendly and robust. All corrosion sensitive parts are polished or galvanised, which ensures a long service life.

Advantages

- Suitable for extra wide paper tape
- Accurate length detection
- Repeat button for two lengths
- Delivery speed 33 meters / min.

Technical data:

| | |
|------------------------|--|
| Speed | 33 mtr / min |
| Dimensions (L x W x D) | 450 x 400 x 250 mm |
| Consumables | Every type of gummed paper tape* * also reinforced tape |
| Roll width | Max. 200 mm |
| Ejection length | 100 - 2100 mm |
| Outer roll diameter | Max. 200 mm |
| Water reservoir | 1300 cc |
| Water temperature | Adjustable (50° - 75° - 100°) |
| Power supply | 230 V / 50 Hz / 1 phase Cut-off after 30 minutes |
| Weight | 15 kg |
| Noise | 70 dB |
