TAPING

The ORS is a strapping tool suitable for both polypropylene (PP) and hotmelt polyester strapping material. Buckles should be used to close the strap. Both steel and plastic buckles are suitable for making the strapping. The ORS is easy to use and most suitable for strapping small numbers of packages / strapping per day or to strap on location.

Advantages

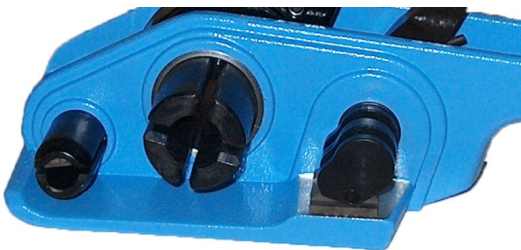

- For PP strap 13-19 mm
- For hotmelt PET strap
- Easy to operate
- Closes with a buckle (plastic or steel)
- For a small number of strappings per day
- For light and medium applications

Accessories

- Strap dispenser QPWM
- Buckles
